DIRECTIONS FOR USE:

For aerial applications only.

Apply from 14 days prior to planting to 7 days after planting, but prior to weed emergence.

Command 3ME may be applied after planting as an early post treatment to rice at the 1-2 leaf stage to provide pre-emergent and residual control of grass weeds. For control of existing grass present at the time of application include one of the following postemergence herbicides registered for control of grass weeds in rice. Command 3ME may only be tank-mixed with one tankmix partner among the following herbicides: AIM, Bolero, Clincher, Cornerstone, Duet, Facet, Glyphomax Plus, Glyphos Xtra, Newpath, Propanil, Regiment, Ricestar, Stam, Super Wham, Touchdown IQ as well as a Crop oil Concentrate or Non-ionic surfactant. Only a single application of Command 3ME + an approved glyphosate formulation is allowed per season.

Observe all buffer restrictions noted in the Application Precautions and Restrictions sections.

Partial weed control may result if levees are pulled after Command 3ME has been applied.

Additional use of labeled post-emerge herbicide applications may be required where existing grass weeds are present at the time of application.

CROP SAFETY PRECAUTIONS:

Application of Command 3ME herbicide to fields which have been precision leveled with deep cuts may result in rice crop injury including stand loss. Consult with rice specialists for soil amending practices which can reduce potential for herbicide injury in precision leveled fields.

AERIAL APPLICATION REQUIREMENTS:

Refer to: Arkansas Pesticide Use and Application Act and Regulations. Act 389 of 1975 as amended (pages 15-17).

APPLICATION PRECAUTIONS:

Caution must be taken to minimize off target drift of Command 3 ME as off-site movement of Command can cause foliar whitening or yellowing of some plants.

Do not apply Command 3ME herbicide within 1,200 feet of the areas listed below:

Towns and Housing Developments

Commercial Vegetable Production (except peppers, pumpkins, succulent peas, sweet corn, sweet potato and winter squash)

Commercial Fruit / Nut Production

Commercial Nurseries

Commercial Greenhouses

Avoid making applications of Command 3 ME herbicide when spray particles may be carried by air currents to areas where sensitive crops and plants are growing, or when temperature inversions exist. Prior to application, adjacent properties must be checked, and applications within 300 feet of desirable plants must be avoided.

RESTRICTIONS:

Command 3ME may be applied to water seeded rice 14 days prior to planting or during rice pegging up to re-flooding but prior to grass emergence.

With split applications do not apply more than a total of 1.6 pt/A Command 3ME (0.6 lbs ai/A) per season.

Do not use Command 3ME herbicide for weed control in rice planted in sand, loamy sand or sandy loam soils.

Do not apply Command 3ME herbicide on rice fields in which concurrent crayfish or catfish farming is included in the cultural practices.

Do not use water containing Command 3ME residues from rice cultivation to irrigate food or feed crops, which are not registered for use with Command 3ME.

In addition to the above statewide requirements, the following additional restriction shall apply to Poinsett County:
